Lightning Protection Demonstration Kit

HLP Systems is proud to offer handcrafted, lightning protection demonstration kits.

Each kit features a full, two-story, 1/2" scale house complete with utility boxes and cutaway sections to see how concealed systems are installed.

The discharge display is provided by a 250,000V tesla coil secured inside the house.

Customize a kit with a company logo engraved into the front of the kit.

Easy set up and installation with only a 110V outlet needed and discharges occur with the flip of a switch!

All kits are made to order and fully customizable. Paint colors, finishes, logos, etc. can be specified at the time of order.
